

## USG ABDOMEN&PELVIS

**LIVER:** Liver measures 13cms, normal in size with mildly increased echogenicity. No obvious focal lesions noted. Portal vein appears normal.

**BILIARY SYSTEM:** The gall bladder is minimally distended. The common duct is not dilated. No evidence of intra hepatic biliary radicle dilatation.

**PANCREAS:** Neck of pancreas visualized and appears normal. Rest obscured by bowel gas.

**SPLEEN:** Normal in size and echotexture. No focal or diffuse lesions seen.

**KIDNEYS:** Right kidney measures 10x3.4cm and left kidney measures 10x4.1cm in size. Both kidneys are normal in size and cortical echogenicity. Cortico medullary differentiation is maintained. No calculus or mass seen. No dilatation of pelvicalyceal system bilaterally. Both ureters are obscured by bowel gas.

**URINARY BLADDER:** Distended and appears normal. No calculus or mass seen. No significant wall thickening.

**UTERUS:** Anteverted. Measures 7.2x3.5x3.5cm, normal in size and echotexture. No focal myometrial lesions seen. Endometrial thickness measures 11.3mm.

**OVARIES:** Right ovary measures 3.5x1.8x2.9cm (Volume 10.2cc), antral follicle count of 11 and antral follicle size ranging from 2-6mm.

Left ovary measures 3.1x1.7x4.2cm (Volume 12.4cc) in size, antral follicle count of 12 and antral follicle size ranging from 2-9mm.

Both ovaries are mildly bulky in size and shows increased stromal echogenicity.

No adnexal masses seen.

Aorta and paraaortic areas obscured by bowel gas. No ascites.

Mild probe tenderness noted in RIF, however appendix could not be visualised due to overlying bowel gas. No evidence of free fluid/ collection in RIF.
